

SAP List Viewer (ALV): A Practical Guide for ABAP Developers

By Kathi Kones

SAP List Viewer (ALV): A Practical Guide for ABAP Developers By Kathi Kones

This book is geared towards ABAP developers and offers detailed information on how to use SAP List Viewer (ALV) to display business data with an interface that lets users rearrange, sort, total, and download data. Obtain comprehensive information on how to write a basic ALV program. Walk through a detailed training scenario and get tips on how to adapt the scenario for your company. Readers will master two ALV types: control framework and function modules. Identify when to use object-oriented techniques and when it may make more sense to quickly adjust existing ALV programs. By using practical examples, tips, and screenshots, the author brings ABAP developers up to speed on SAP ALV.

- Learn how to write a basic SAP ALV program
- Walk through the object-oriented control framework and function modules
- Get tips on adding sorting and grouping features
- Dive into how to add editable fields, events, and layout variants

Editorial Review

About the Author

Kathi Kones has been working with SAP software since 1995. After completing her computer science degree at Minnesota State University, Mankato, she was hired by General Mills, Inc., a global corporation that developed in-house talent and encouraged job changes within the company. She gained SAP R/2 and R/3 experience in the roles of functional analyst, ABAP developer, project manager, Finance master data migration specialist, and integration manager. She participated in four SAP implementations and worked in eight countries. Kathi has most recently worked on SAP master data management projects as a consultant for ThreeBridge Solutions, LLC, Minneapolis, Minnesota.

Users Review

From reader reviews:
