OSCE & LMCC-II: Review Notes From Detselig Enterprises Ltd.

This OSCE & LMCC - II: Review Notes originated from collections of study notes that passed on from several resident training programs in Canada. It provides an unofficial guide for the preparation of LMCC - Part II examination. It is also useful for the preparation of Clinical Skills Assessment examination for US residents. This book presents approximately 200 most commonly encountered clinical scenarios. It not only helps in the preparation of the examination, but also helps in daily clinical practice. A word of advice is to practice these skills every time a patient is seen in the clinical rotation. This study notes collection is by no means a complete official answer to any of these questions. However, it can be used as a framework where new information can be added. This book complements many texts that contain more in depth information about these clinical entities.
