

Science Education for Everyday Life: Evidence-based Practice (Ways of Knowing in Science and Mathematics (Paper))

By Glen S. Aikenhead

Science Education for Everyday Life: Evidence-based Practice (Ways of Knowing in Science and Mathematics (Paper)) By Glen S. Aikenhead

This book provides a comprehensive overview of humanistic approaches to science that connect students to broader human concerns in their everyday life and culture. Glen Aikenhead, an expert in the field of culturally sensitive science education, summarizes major worldwide historical findings, focuses on present thinking, and offers evidence in support of classroom practice. This highly accessible text covers curriculum policy, teaching materials, teacher orientations and teacher education, student learning, culture studies, and future research.

Featuring important alternative views on the teaching of science, this text:

- * Describes an approach to teaching science (grades 6-12) that animates students' self-identities, encouraging their future contributions to society as savvy citizens and productive workers.
- * Addresses the tension between educationally sound ideas and the political realities of schools.
- * Presents evidence-based challenges to traditional thinking about school science, illuminating many productive directions for future research.
