

# Subsea Pipelines and Risers (Ocean Engineering)

*From Elsevier Science*

**Subsea Pipelines and Risers (Ocean Engineering)** From Elsevier Science

- Updated edition of a best-selling title
- Author brings 25 years experience to the work
- Addresses the key issues of economy and environment

Marine pipelines for the transportation of oil and gas have become a safe and reliable way to exploit the valuable resources below the world's seas and oceans. The design of these pipelines is a relatively new technology and continues to evolve in its quest to reduce costs and minimise the effect on the environment.

With over 25years experience, Professor Yong Bai has been able to assimilate the essence of the applied mechanics aspects of offshore pipeline system design in a form of value to students and designers alike. It represents an excellent source of up to date practices and knowledge to help equip those who wish to be part of the exciting future of this industry.

### Editorial Review

#### About the Author

Dr. Yong Bai obtained a Ph.D. in Offshore Structures at Hiroshima University, Japan in 1989. He is currently President of Offshore Pipelines and Risers (OPR Inc., a design/consulting firm in the field of subsea pipelines, risers and floating systems. In the 1990's, he had been a technical leader for several Asgard Transport pipeline and flowline projects at JP Kenny as Manager of the advanced engineering department. Yong was previously a lead riser engineer at Shell and assisted in offshore rules development at the American Bureau of Shipping (ABS) as Manager of the offshore technology department. While a professor, he wrote several books and served as a course leader on the design of subsea pipelines and risers as well as design of floating systems. He also serves at Zhejiang University in China as professor.

Dr. Qiang Bai obtained a doctorate for Mechanical Engineering at Kyushu University, Japan in 1995. He has more than 20 years of experience in subsea/offshore engineering including research and engineering execution. He has worked at Kyushu University in Japan, UCLA, OPE, JP Kenny, and Technip. His experience includes various aspects of flow assurance and the design and installation of subsea structures, pipelines and riser systems.

### Users Review

#### From reader reviews:

##### Byron Sierra:

The book Subsea Pipelines and Risers (Ocean Engineering) gives you the sense of being enjoy for your spare time. You can use to make your capable far more increase. Book can for being your best friend when you getting anxiety or having big problem with your subject. If you can make examining a book Subsea Pipelines and Risers (Ocean Engineering) to be your habit, you can get far more advantages, like add your current capable, increase your knowledge about some or all subjects. You are able to know everything if you like available and read a book Subsea Pipelines and Risers (Ocean Engineering). Kinds of book are a lot of. It means that, science reserve or encyclopedia or some others. So , how do you think about this guide?

##### Roger Cooper:

What do you regarding book? It is not important with you? Or just adding material when you really need something to explain what the one you have problem? How about your free time? Or are you busy man or woman? If you don't have spare time to accomplish others business, it is make one feel bored faster. And you have free time? What did you do? Every person has many questions above. They must answer that question simply because just their can do which. It said that about reserve. Book is familiar on every person. Yes, it is appropriate. Because start from on guardería until university need that Subsea Pipelines and Risers (Ocean Engineering) to read.

**David Byrd:**

Information is provisions for those to get better life, information nowadays can get by anyone in everywhere. The information can be a know-how or any news even a problem. What people must be consider if those information which is inside former life are hard to be find than now could be taking seriously which one is acceptable to believe or which one the particular resource are convinced. If you have the unstable resource then you have it as your main information it will have huge disadvantage for you. All of those possibilities will not happen inside you if you take Subsea Pipelines and Risers (Ocean Engineering) as your daily resource information.

**Bernice Martinez:**

Playing with family inside a park, coming to see the water world or hanging out with pals is thing that usually you have done when you have spare time, in that case why you don't try point that really opposite from that. 1 activity that make you not sensation tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of information. Even you love Subsea Pipelines and Risers (Ocean Engineering), you can enjoy both. It is very good combination right, you still wish to miss it? What kind of hang type is it? Oh occur its mind hangout folks. What? Still don't understand it, oh come on its identified as reading friends.
