Graph Databases By Ian Robinson, Jim Webber, Emil Eifrem

Discover how graph databases can help you manage and query highly connected data. With this practical book, you'll learn how to design and implement a graph database that brings the power of graphs to bear on a broad range of problem domains. Whether you want to speed up your response to user queries or build a database that can adapt as your business evolves, this book shows you how to apply the schema-free graph model to real-world problems.

Learn how different organizations are using graph databases to outperform their competitors. With this book's data modeling, query, and code examples, you'll quickly be able to implement your own solution.

• Model data with the Cypher query language and property graph model
• Learn best practices and common pitfalls when modeling with graphs
• Plan and implement a graph database solution in test-driven fashion
• Explore real-world examples to learn how and why organizations use a graph database
• Understand common patterns and components of graph database architecture
• Use analytical techniques and algorithms to mine graph database information

Editorial Review

About the Author

Ian Robinson is the co-author of *REST in Practice* (O'Reilly Media, 2010). Ian is an engineer at Neo Technology, working on a distributed version of the Neo4j database. Prior to joining the engineering team, Ian served as Neo's Director of Customer Success, managing the training, professional services, and support arms of Neo, and working with customers to design and develop mission-critical graph database solutions. Ian came to Neo Technology from ThoughtWorks, where he was SOA Practice Lead and a member of the CTO's global Technical Advisory Board. Ian presents frequently at conferences worldwide on topics including the application of graph database technologies, and RESTful enterprise integration.

Dr. Jim Webber is Chief Scientist with Neo Technology, where he researches novel graph databases and writes open source software. Previously, Jim spent time working with big graphs like the Web for building distributed systems, which led him to being a co-author on the book *REST in Practice* (O'Reilly Media, 2010). Jim is active in the development community, presenting regularly around the world. His blog is located at http://jimwebber.org and he tweets often @jimwebber.

Emil Eifrem is CEO of Neo Technology and co-founder of the Neo4j project. Before founding Neo, he was the CTO of Windh AB, where he headed the development of highly complex information architectures for Enterprise Content Management Systems. Committed to sustainable open source, he guides Neo along a balanced path between free availability and commercial reliability. Emil is a frequent conference speaker and author on NOSQL databases.

Users Review

From reader reviews:

Nancy Figaro:

In other case, little folks like to read book Graph Databases. You can choose the best book if you want reading a book. Given that we know about how is important the book Graph Databases. You can add understanding and of course you can around the world by way of a book. Absolutely right, since from book you can recognize everything! From your country right up until foreign or abroad you will end up known. About simple matter until wonderful thing you can know that. In this era, you can open a book or maybe searching by internet device. It is called e-book. You can use it when you feel uninterested to go to the library. Let's learn.

Sam Hasse:

The book Graph Databases make one feel enjoy for your spare time. You should use to make your capable considerably more increase. Book can to become your best friend when you getting stress or having big problem together with your subject. If you can make reading through a book Graph Databases to be your

habit, you can get far more advantages, like add your capable, increase your knowledge about some or all subjects. You are able to know everything if you like open up and read a book Graph Databases. Kinds of book are a lot of. It means that, science book or encyclopedia or others. So , how do you think about this book?

Jacqueline Thompson:

Would you one of the book lovers? If yes, do you ever feeling doubt while you are in the book store? Try to pick one book that you never know the inside because don't assess book by its protect may doesn't work here is difficult job because you are frightened that the inside maybe not seeing that fantastic as in the outside search likes. Maybe you answer might be Graph Databases why because the great cover that make you consider in regards to the content will not disappoint you actually. The inside or content is usually fantastic as the outside or maybe cover. Your reading 6th sense will directly make suggestions to pick up this book.

Diane McCarthy:
