

## Event Mining: Algorithms and Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series)

From Chapman and Hall/CRC

### Event Mining: Algorithms and Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) From Chapman and Hall/CRC

Event mining encompasses techniques for automatically and efficiently extracting valuable knowledge from historical event/log data. The field, therefore, plays an important role in data-driven system management. **Event Mining: Algorithms and Applications** presents state-of-the-art event mining approaches and applications with a focus on computing system management.

The book first explains how to transform log data in disparate formats and contents into a canonical form as well as how to optimize system monitoring. It then shows how to extract useful knowledge from data. It describes intelligent and efficient methods and algorithms to perform data-driven pattern discovery and problem determination for managing complex systems. The book also discusses data-driven approaches for the detailed diagnosis of a system issue and addresses the application of event summarization in Twitter messages (tweets).

Understanding the interdisciplinary field of event mining can be challenging as it requires familiarity with several research areas and the relevant literature is scattered in diverse publications. This book makes it easier to explore the field by providing both a good starting point for readers not familiar with the topics and a comprehensive reference for those already working in this area.

### Editorial Review

About the Author

**Dr. Tao Li** is a professor and Graduate Program Director in the School of Computing and Information Sciences at Florida International University (FIU) and a professor in the School of Computer Science at Nanjing University of Posts and Telecommunication. He is on the editorial boards of *ACM Transactions on Knowledge Discovery from Data*, *IEEE Transactions on Knowledge and Data Engineering*, and *Knowledge and Information System Journal*. He has received numerous honors, including an NSF CAREER Award, IBM Faculty Research Awards, an FIU Excellence in Research and Creativities Award, and IBM Scalable Data Analytics Innovation Award and Mentorship Awards. His research interests are in data mining, information retrieval, and computing system management. He received a PhD in computer science from the University of Rochester.

### Users Review

**From reader reviews:**

**Joseph Braddock:**

The book Event Mining: Algorithms and Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) can give more knowledge and also the precise product information about everything you want. Why must we leave a good thing like a book Event Mining: Algorithms and Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series)? Some of you have a different opinion about reserve. But one aim which book can give many information for us. It is absolutely appropriate. Right now, try to closer using your book. Knowledge or information that you take for that, you can give for each other; you are able to share all of these. Book Event Mining: Algorithms and Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) has simple shape but you know: it has great and large function for you. You can appearance the enormous world by available and read a e-book. So it is very wonderful.

**Mary Kenney:**

Information is provisions for folks to get better life, information presently can get by anyone at everywhere. The information can be a know-how or any news even an issue. What people must be consider when those information which is inside former life are challenging to be find than now's taking seriously which one is appropriate to believe or which one the resource are convinced. If you find the unstable resource then you get it as your main information you will see huge disadvantage for you. All those possibilities will not happen within you if you take Event Mining: Algorithms and Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) as your daily resource information.

**Joan Ortega:**

The publication untitled Event Mining: Algorithms and Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) is the book that recommended to you to study. You can see the quality of the reserve content that will be shown to a person. The language that article author use to explained their way of doing something is easily to understand. The article writer was did a lot of research when write the book, and so the information that they share to you personally is absolutely accurate. You also could possibly get the e-book of Event Mining: Algorithms and Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) from the publisher to make you much more enjoy free time.

**Dorcas Rogers:**

Often the book Event Mining: Algorithms and Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) has a lot associated with on it. So when you read this book you can get a lot of advantage. The book was published by the very famous author. The author makes some research ahead of write this book. This specific book very easy to read you may get the point easily after reading this article book.
