

## Displaying Time Series, Spatial, and Space-Time Data with R (Chapman & Hall/CRC The R Series)

By Oscar Perpiñán Lamigueiro

### Displaying Time Series, Spatial, and Space-Time Data with R (Chapman & Hall/CRC The R Series) By Oscar Perpiñán Lamigueiro

#### *Code and Methods for Creating High-Quality Data Graphics*

A data graphic is not only a static image, but it also tells a story about the data. It activates cognitive processes that are able to detect patterns and discover information not readily available with the raw data. This is particularly true for time series, spatial, and space-time datasets.

Focusing on the exploration of data with visual methods, **Displaying Time Series, Spatial, and Space-Time Data with R** presents methods and R code for producing high-quality graphics of time series, spatial, and space-time data. Practical examples using real-world datasets help you understand how to apply the methods and code.

The book illustrates how to display a dataset starting with an easy and direct approach and progressively adding improvements that involve more complexity. Each of the book's three parts is devoted to different types of data. In each part, the chapters are grouped according to the various visualization methods or data characteristics.

#### *Web Resource*

Along with the main graphics from the text, the author's website offers access to the datasets used in the examples as well as the full R code. This combination of freely available code and data enables you to practice with the methods and modify the code to suit your own needs.

### Editorial Review

#### Review

"... a practical guide for producing high-quality graphics for time series, spatial data and space-time data using the statistical software package R. ... recommended as a practical guide for readers with fair knowledge of programming with R. All visualization methods are presented by means of real data sets and programming code is available."

?*Zentralblatt MATH* 1306

"... a researcher in this field will particularly benefit from this compact account of some elegant visualization techniques implemented in R for time, space, and timespace data. ... Colorful illustrations that nicely complement the descriptive aspects of the book help in the process of understanding. ... a valuable source of graphical visualization analyses in R ..."

?*International Statistical Review*, 2015

#### About the Author

**Oscar Perpiñán Lamigueiro** is a lecturer of photovoltaic and solar energy at the Escuela de Organización Industrial (EOI) and an assistant professor of electrical engineering at the Universidad Politécnica de Madrid (UPM). He develops R packages that provide graphical methods to display multivariate time series, spatial data, and space-time data (*rasterVis* and *solaR*).

### Users Review

#### From reader reviews:

##### **Daniel Weimer:**

The book *Displaying Time Series, Spatial, and Space-Time Data with R (Chapman & Hall/CRC The R Series)* give you a sense of feeling enjoy for your spare time. You can use to make your capable far more increase. Book can for being your best friend when you getting anxiety or having big problem using your subject. If you can make studying a book *Displaying Time Series, Spatial, and Space-Time Data with R (Chapman & Hall/CRC The R Series)* being your habit, you can get more advantages, like add your own capable, increase your knowledge about many or all subjects. You can know everything if you like start and read a book *Displaying Time Series, Spatial, and Space-Time Data with R (Chapman & Hall/CRC The R Series)*. Kinds of book are a lot of. It means that, science e-book or encyclopedia or some others. So , how do you think about this guide?

##### **Mary Conley:**

The book *Displaying Time Series, Spatial, and Space-Time Data with R (Chapman & Hall/CRC The R Series)* will bring someone to the new experience of reading a new book. The author style to explain the idea is very unique. In the event you try to find new book to study, this book very suitable to you. The book

Displaying Time Series, Spatial, and Space-Time Data with R (Chapman & Hall/CRC The R Series) is much recommended to you to study. You can also get the e-book in the official web site, so you can quickly to read the book.

**Jacqueline Campbell:**

Spent a free time for you to be fun activity to do! A lot of people spent their free time with their family, or their own friends. Usually they undertaking activity like watching television, likely to beach, or picnic inside park. They actually doing same task every week. Do you feel it? Do you need to something different to fill your free time/ holiday? May be reading a book can be option to fill your cost-free time/ holiday. The first thing you ask may be what kinds of guide that you should read. If you want to consider look for book, may be the reserve untitled Displaying Time Series, Spatial, and Space-Time Data with R (Chapman & Hall/CRC The R Series) can be fine book to read. May be it may be best activity to you.

**Jennifer Buster:**

The book untitled Displaying Time Series, Spatial, and Space-Time Data with R (Chapman & Hall/CRC The R Series) contain a lot of information on the idea. The writer explains her idea with easy method. The language is very clear to see all the people, so do certainly not worry, you can easy to read the item. The book was authored by famous author. The author will take you in the new period of literary works. It is easy to read this book because you can read more your smart phone, or program, so you can read the book in anywhere and anytime. In a situation you wish to purchase the e-book, you can available their official web-site in addition to order it. Have a nice study.
