Foundations of Differentiable Manifolds and Lie Groups (Graduate Texts in Mathematics) By Frank W. Warner

Foundations of Differentiable Manifolds and Lie Groups gives a clear, detailed, and careful development of the basic facts on manifold theory and Lie Groups. Coverage includes differentiable manifolds, tensors and differentiable forms, Lie groups and homogenous spaces, and integration on manifolds. The book also provides a proof of the de Rham theorem via sheaf cohomology theory and develops the local theory of elliptic operators culminating in a proof of the Hodge theorem.

Editorial Review

Users Review

From reader reviews:

Sheila Walker:

As people who live in the modest era should be up-date about what going on or info even knowledge to make these keep up with the era and that is always change and move ahead. Some of you maybe may update themselves by examining books. It is a good choice in your case but the problems coming to you actually is you don't know what type you should start with. This Foundations of Differentiable Manifolds and Lie Groups (Graduate Texts in Mathematics) is our recommendation to make you keep up with the world. Why, since this book serves what you want and wish in this era.

Randal Revilla:

Do you have something that you like such as book? The book lovers usually prefer to choose book like comic, small story and the biggest the first is novel. Now, why not seeking Foundations of Differentiable Manifolds and Lie Groups (Graduate Texts in Mathematics) that give your fun preference will be satisfied by simply reading this book. Reading addiction all over the world can be said as the way for people to know world better then how they react towards the world. It can't be claimed constantly that reading behavior only for the geeky individual but for all of you who wants to always be success person. So , for all of you who want to start examining as your good habit, you are able to pick Foundations of Differentiable Manifolds and Lie Groups (Graduate Texts in Mathematics) become your starter.

Fern Marshall:

That e-book can make you to feel relax. That book Foundations of Differentiable Manifolds and Lie Groups (Graduate Texts in Mathematics) was vibrant and of course has pictures on there. As we know that book Foundations of Differentiable Manifolds and Lie Groups (Graduate Texts in Mathematics) has many kinds or category. Start from kids until youngsters. For example Naruto or Detective Conan you can read and think you are the character on there. Therefore not at all of book tend to be make you bored, any it offers up you feel happy, fun and chill out. Try to choose the best book in your case and try to like reading which.

Ana Vela:

A lot of people said that they feel weary when they reading a book. They are directly felt this when they get a half parts of the book. You can choose the actual book Foundations of Differentiable Manifolds and Lie Groups (Graduate Texts in Mathematics) to make your own reading is interesting. Your skill of reading proficiency is developing when you like reading. Try to choose basic book to make you enjoy to read it and

mingle the opinion about book and reading through especially. It is to be initially opinion for you to like to start a book and go through it. Beside that the publication Foundations of Differentiable Manifolds and Lie Groups (Graduate Texts in Mathematics) can to be your brand new friend when you're really feel alone and confuse using what must you're doing of that time.
