The Martian Chronicles By Ray Bradbury

Mars was a distant shore, and the men spread upon it in waves... Each wave different, and each wave stronger.

The Martian Chronicles

Ray Bradbury is a storyteller without peer, a poet of the possible, and, indisputably, one of America's most beloved authors. In a much celebrated literary career that has spanned six decades, he has produced an astonishing body of work: unforgettable novels, including *Fahrenheit 451* and *Something Wicked This Way Comes*; essays, theatrical works, screenplays and teleplays; *The Illustrated Mein*, *Dandelion Wine*, *The October Country*, and numerous other superb short story collections. But of all the dazzling stars in the vast Bradbury universe, none shines more luminous than these masterful chronicles of Earth's settlement of the fourth world from the sun.

Bradbury's Mars is a place of hope, dreams and metaphor-of crystal pillars and fossil seas-where a fine dust settles on the great, empty cities of a silently destroyed civilization. It is here the invaders have come to despoil and commercialize, to grow and to learn -first a trickle, then a torrent, rushing from a world with no future toward a promise of tomorrow. The Earthman conquers Mars ... and then is conquered *by* it, lulled by dangerous lies of comfort and familiarity, and enchanted by the lingering glamour of an ancient, mysterious native race.

Ray Bradbury's *The Martian Chronicles* is a classic work of twentieth-century literature whose extraordinary power and imagination remain undimmed by time's passage. In connected, chronological stories, a true grandmaster once again enthralls, delights and challenges us with his vision and his heart-starkly and stunningly exposing in brilliant spacelight our strength, our weakness, our folly, and our poignant humanity on a strange and breathtaking world where humanity does not belong.

Editorial Review

Amazon.com Review

From "Rocket Summer" to "The Million-Year Picnic," Ray Bradbury's stories of the colonization of Mars form an eerie mesh of past and future. Written in the 1940s, the chronicles drip with nostalgic atmosphere--shady porches with tinkling pitchers of lemonade, grandfather clocks, chintz-covered sofas. But longing for this comfortable past proves dangerous in every way to Bradbury's characters--the golden-eyed Martians as well as the humans. Starting in the far-flung future of 1999, expedition after expedition leaves Earth to investigate Mars. The Martians guard their mysteries well, but they are decimated by the diseases that arrive with the rockets. Colonists appear, most with ideas no more lofty than starting a hot-dog stand, and with no respect for the culture they've displaced.

Bradbury's quiet exploration of a future that looks so much like the past is sprinkled with lighter material. In "The Silent Towns," the last man on Mars hears the phone ring and ends up on a comical blind date. But in most of these stories, Bradbury holds up a mirror to humanity that reflects a shameful treatment of "the other," yielding, time after time, a harvest of loneliness and isolation. Yet the collection ends with hope for renewal, as a colonist family turns away from the demise of the Earth towards a new future on Mars. Bradbury is a master fantasist and *The Martian Chronicles* are an unforgettable work of art. --Blaise Selby
