HADRON Axiom By Stephen Arseneault

The second book of the **HADRON** series. Life is a struggle. Especially so when power, food and transportation are lost. Much of the population has perished by starvation and murder. Hard choices have to be made. And now an alien species has arrived. They seem friendly and genuine in their offer to help. Should man trust them? Are they really here to save mankind? All may not be as it seems. Their benevolent actions and encouraging words may not hold true.

Also available from this author:

SODIUM Series

A six-book series that takes Man from his first encounter with aliens all the way to a fight for our all-out survival. Do we have what it takes to rule the galaxy?

AMP Series

OMEGA Series

Cast a thousand years into the future beyond **AMP**. The Alliance is crumbling. When corruption and politics threaten to throw the allied galaxies into chaos, Knog Beutcher gets caught in the middle. Follow along as our hero is thrust into roles that he never expected or sought. Espionage, intrigue, political assassinations, rebellions and full-on revolutions, they are all coming to Knog Beutcher's world!

HADRON Series

HADRON is a modern day story unrelated to the **SODIUM-AMP-OMEGA** trilogy series. After scientists using the Large Hadron Collider discover dark matter, the world is plunged into chaos. Massive waves of electromagnetic interference take out all grid power and forms of communication the world over. Cities go dark, food and water supplies are quickly used up, and marauders rule the highways. One group of citizens takes a stand. Can they make a difference?

And the devastating EM waves, where are they coming from? After months of starvation, a benevolent species arrive in their spaceships to rescue the Human race. Only, are they really so benevolent?

ARMS Series

ARMS is set in the future after Earth was nearing an apocalyptic event. Two competing colony ships were built, taking five million inhabitants each through a wormhole to a pair of newly discovered planets. The planets were settled and not long after the colonies looked to the surrounding star systems for ownership and expansion, which led to a centuries long war between them. A truce was declared after the aggressor side began to lose ground.

Tawnish Freely and Harris Gruberg are genetically engineered Biomarines. Their lives have been dedicated to fighting the war. They find themselves struggling to find work among a population that fears them. Work is found only by delving into the delivery of illegal arms to the outer colonies. Things go awry when they discover their illicit dealings may just be the catalyst that brings back the Great War. They are determined to prevent that from happening.

About the Author

I came to this planet fifty some odd years ago. After exiting my mother's portal, the doctor slapped me around until I started breathing the oxygen. I'll admit, at the time, I had no idea what I was doing or where I was. Being an infant Human, I was completely reliant on the responsible actions of others. It was a time that I have largely forgotten. I reside in Central Florida with the wife and children. After thirty years in engineering, my time is now spent chronicling the adventures of fictitious heroes. They are off-world, fighting the good fight. For me? I'm stuck here on this planet in this feeble existence that we Humans are all forced to endure. So, I ask you this... do you wish to escape the bonds of this surly planet we call Earth? Are you looking for a bit more adventure than what the grocery store has to offer? Do you worry about being enslaved by alien androids or six-eyed alien goats with lasers? Pew, pew, pew! Yeah, that's what I thought. Asking yourself those questions and getting back an answer is the first hurdle to cross in the race to get off this world. Sounds like you are ready to venture out, to put this place behind you. So crack open one of my books. Take to the heavens and let me shout this out to those who remain: "Watch out universe! Another Human is on the loose!
