Editorial Review

From Library Journal

Lucian Freud's figurative paintings are hard to forget-his distinctive brushwork, color combinations, and unique poses create a landscape of translucent skin that is alarming in its frankness yet beautiful in its presentation. This catalog, accompanying a show that will travel through London, Barcelona, and Los Angeles, features key works from each phase of his six-decade-long career, from 1939 to the present. More than 140 full-color illustrations of paintings, drawings, and etchings accompany an essay by Feaver, as well as an extensive bibliography and chronology. A curator, writer, and critic, Feaver provides a historical backdrop and analysis that helps the reader navigate across the decades of Freud's career. This work joins other catalogs (notably Robert Hughes's *Lucian Freud: Paintings* and Catherine Lampert's *Lucian Freud: Recent Works*) in exposing the artist and the evolution of his art, but it incorporates a much greater range of the still-productive artist's life and work. The result is well written, beautifully designed, and recommended for all academic, public, and museum libraries.
