Progress in Inorganic Chemistry, Volume 58 From Wiley

This series provides inorganic chemists and materials scientists with a forum for critical, authoritative evaluations of advances in every area of the discipline. Volume 58 continues to report recent advances with a significant, up-to-date selection of contributions by internationally-recognized researchers.

The chapters of this volume are devoted to the following topics:

- Tris(dithiolene) Chemistry: A Golden Jubilee
- How to find an HNO needle in a (bio)-chemical Haystack
- Photoactive Metal Nitrosyl and Carbonyl Complexes Derived from Designed Auxiliary Ligands: An Emerging Class of Photochemotherapeutics
- Metal--Metal Bond-Containing Complexes as Catalysts for C--H Functionalization Iron Catalysis in Synthetic Chemistry
- Reactive Transition Metal Nitride Complexes

Suitable for inorganic chemists and materials scientists in academia, government, and industries including pharmaceutical, fine chemical, biotech, and agricultural.

Progress in Inorganic Chemistry, Volume 58 From Wiley Bibliography

- Sales Rank: #7369175 in Books
- Published on: 2014-05-05
- Original language: English
- Number of items: 1
- Dimensions: 9.30" h x 1.45" w x 6.35" l, 1.83 pounds
- Binding: Hardcover
- 528 pages

Editorial Review

From the Back Cover

This series provides inorganic chemists and materials scientists with a forum for critical, authoritative evaluations of advances in every area of the discipline. Volume 58 continues to report recent advances with a significant, up-to-date selection of contributions by internationally-recognized researchers.

The chapters of this volume are devoted to the following topics:

- Tris(dithiolene) Chemistry: A Golden Jubilee
- How to find an HNO needle in a (bio)-chemical Haystack
- Photoactive Metal Nitrosyl and Carbonyl Complexes Derived from Designed Auxiliary Ligands: An Emerging Class of Photochemotherapeutics
- Metal--Metal Bond-Containing Complexes as Catalysts for C--H Functionalization Iron Catalysis in Synthetic Chemistry
- Reactive Transition Metal Nitride Complexes

About the Author

Kenneth D. Karlin is the Ira Remsen Professor of Chemistry at Johns Hopkins University. He received his PhD from Columbia University. Dr. Karlin's bioinorganic research focuses on coordination chemistry relevant to biological and environmental processes, involving copper or heme (porphyrin-iron) complexes. Dr. Karlin's main approach involves synthetic modeling, i.e. biomimetic chemistry. He is the winner of the prestigious F. Albert Cotton Award in Synthetic Inorganic Chemistry and the Sierra Nevada Distinguished Chemist Award, both awarded in 2009

Users Review

From reader reviews:

Karolyn Kaufman:

The particular book Progress in Inorganic Chemistry, Volume 58 will bring one to the new experience of reading the book. The author style to spell out the idea is very unique. When you try to find new book to see, this book very acceptable to you. The book Progress in Inorganic Chemistry, Volume 58 is much recommended to you to see. You can also get the e-book from your official web site, so you can quickly to read the book.

Hoyt Moore:

The guide untitled Progress in Inorganic Chemistry, Volume 58 is the guide that recommended to you you just read. You can see the quality of the e-book content that will be shown to an individual. The language that writer use to explained their ideas are easily to understand. The writer was did a lot of exploration when write the book, and so the information that they share to you personally is absolutely accurate. You also

could possibly get the e-book of Progress in Inorganic Chemistry, Volume 58 from the publisher to make you considerably more enjoy free time.

Christopher Palmer:

Progress in Inorganic Chemistry, Volume 58 can be one of your basic books that are good idea. Many of us recommend that straight away because this publication has good vocabulary that can increase your knowledge in words, easy to understand, bit entertaining but nonetheless delivering the information. The article author giving his/her effort to set every word into delight arrangement in writing Progress in Inorganic Chemistry, Volume 58 but doesn't forget the main place, giving the reader the hottest along with based confirm resource facts that maybe you can be one of it. This great information can drawn you into completely new stage of crucial contemplating.

Katrina Hering:

As we know that book is vital thing to add our information for everything. By a book we can know everything we really wish for. A book is a range of written, printed, illustrated or maybe blank sheet. Every year had been exactly added. This book Progress in Inorganic Chemistry, Volume 58 was filled about science. Spend your spare time to add your knowledge about your scientific research competence. Some people has various feel when they reading a book. If you know how big benefit from a book, you can feel enjoy to read a book. In the modern era like currently, many ways to get book you wanted.
