### The Universe: Leading Scientists Explore the Origin, Mysteries, and Future of the Cosmos (Best of Edge Series) By John Brockman

John Brockman brings together the world's best-known physicists and science writers—including Brian Greene, Walter Isaacson, Nobel Prize-winner Frank Wilczek, Benoit Mandelbrot, and Martin Rees—to explain the universe in all wondrous splendor.

In *The Universe*, today's most influential science writers explain the science behind our evolving understanding of the universe and everything in it, including the cutting edge research and discoveries that are shaping our knowledge.

Lee Smolin reveals how math and cosmology are helping us create a theory of the whole universe. Benoit Mandelbrot looks back on a career devoted to fractal geometry. Neil Turok analyzes the fundamental laws of nature, what came before the big bang, and the possibility of a unified theory.

Seth Lloyd investigates the impact of computational revolutions and the informational revolution. Lawrence Krauss provides fresh insight into gravity, dark matter, and the energy of empty space. Brian Greene and Walter Isaacson illuminate the genius who revolutionized modern science: Albert Einstein. And much more.

Explore the universe with some of today's greatest minds: what it is, how it came into being, and what may happen next.

### Editorial Review

#### Review

“Illuminating, mind-expanding. ... A spectacular, mind-bending read. ” (Brain Pickings)

#### From the Back Cover

Explore the universe with today's greatest physicists.

In the wake of one of the most groundbreaking scientific breakthroughs in modern times, the March 2014 discovery of gravitational ripples from the Big Bang—an apparent confirmation of Alan Guth and Andrei Linde's theory of cosmic inflation—John Brockman of Edge.org has gathered together some of the world's best minds to explain the universe as we currently know it. The contributors—many pioneering theoretical physicists and cosmologists, including Guth and Linde—provide an extraordinary picture of cosmology as it has developed over the past three decades.

- Alan Guth and Andrei Linde explain the Inflationary Universe theory.
- Lee Smolin discusses the nature of time.
- Lisa Randall and Neil Turok elaborate on the theory of branes, two-dimensional structures arising from string theory—whose existence is central to the cyclic universe.
- Seth Lloyd investigates how the universe behaves like a self-programming computer.
- Lawrence Krauss provides fresh insight into gravity, dark matter, and the energy of empty space.
- Brian Greene and Einstein biographer Walter Isaacson speculate on how Albert Einstein might view the theoretical physics of the twenty-first century.
- The late Benoit Mandelbrot looks back on a long career devoted to fractal geometry.
- Plus Nobel Prize winner Frank Wilczek, Astronomer Royal MaRTin Rees, Caltech physicist Sean Carroll, Stanford's Leonard Susskind, Oxford's David Deutsch, Cornell's Steven Strogatz, Albert Einstein Professor in Science at Princeton Paul Steinhardt, and more!

#### About the Author

The publisher of the online science salon Edge.org, John Brockman is the editor of *Know This, This Idea Must Die, This Explains Everything, This Will Make You Smarter*, and other volumes.

### Users Review

#### From reader reviews:

##### Clara Lee:

Have you spare time for a day? What do you do when you have more or little spare time? Yes, you can choose the suitable activity with regard to spend your time. Any person spent their spare time to take a walk, shopping, or went to often the Mall. How about open or even read a book entitled The Universe: Leading Scientists Explore the Origin, Mysteries, and Future of the Cosmos (Best of Edge Series)? Maybe it is to be best activity for you. You realize beside you can spend your time along with your favorite's book, you can more intelligent than before. Do you agree with it has the opinion or you have some other opinion?

**Richard Morris:**

Reading a book for being new life style in this year; every people loves to study a book. When you go through a book you can get a large amount of benefit. When you read publications, you can improve your knowledge, simply because book has a lot of information onto it. The information that you will get depend on what kinds of book that you have read. If you would like get information about your study, you can read education books, but if you want to entertain yourself read a fiction books, this sort of us novel, comics, as well as soon. The The Universe: Leading Scientists Explore the Origin, Mysteries, and Future of the Cosmos (Best of Edge Series) provide you with a new experience in reading a book.

**Marlon Hood:**

A lot of e-book has printed but it takes a different approach. You can get it by world wide web on social media. You can choose the very best book for you, science, comic, novel, or whatever by means of searching from it. It is called of book The Universe: Leading Scientists Explore the Origin, Mysteries, and Future of the Cosmos (Best of Edge Series). Contain your knowledge by it. Without causing the printed book, it may add your knowledge and make you actually happier to read. It is most important that, you must aware about e-book. It can bring you from one place to other place.

**Shirley Pedro:**

What is your hobby? Have you heard this question when you got learners? We believe that that query was given by teacher to the students. Many kinds of hobby, Every individual has different hobby. And also you know that little person like reading or as studying become their hobby. You need to know that reading is very important as well as book as to be the point. Book is important thing to incorporate you knowledge, except your own personal teacher or lecturer. You discover good news or update in relation to something by book. Amount types of books that can you choose to use be your object. One of them is niagra The Universe: Leading Scientists Explore the Origin, Mysteries, and Future of the Cosmos (Best of Edge Series).
