

Molecular Biology: Structure and Dynamics of Genomes and Proteomes

By Jordanka Zlatanova, Kensal E. van Holde

Molecular Biology: Structure and Dynamics of Genomes and Proteomes By Jordanka Zlatanova, Kensal E. van Holde

Recipient of the CHOICE Outstanding Academic Title (OAT) Award.

Molecular Biology: Structure and Dynamics of Genomes and Proteomes illustrates the essential principles behind the transmission and expression of genetic information at the level of DNA, RNA, and proteins.

This textbook emphasizes the experimental basis of discovery and the most recent advances in the field while presenting a structural, mechanistic understanding of molecular biology that is rigorous, yet concise. The text is written for advanced undergraduate or graduate-level courses in molecular biology.

Molecular Biology: Structure and Dynamics of Genomes and Proteomes is additionally supported by the **Garland Science Learning System**. This homework platform is designed to evaluate and improve student performance and allows instructors to select assignments on specific topics and review the performance of the entire class, as well as individual students, via the instructor dashboard. Students receive immediate feedback on their mastery of the topics, and will be better prepared for lectures and classroom discussions. The user-friendly system provides a convenient way to engage students while assessing progress. Performance data can be used to tailor classroom discussion, activities, and lectures to address students' needs precisely and efficiently.

A **free trial** for the Garland Science Learning System will be available to use during the Spring and Fall 2017 semesters. For more information and to sign up for access, visit <http://garlandscience.rocketmix.com/>.

Editorial Review

About the Author

Jordanka Zlatanova is Professor Emeritus in the Department of Molecular Biology at the University of Wyoming. She earned her PhD and DSc degrees in cellular and molecular biology from the Bulgarian Academy of Sciences, conducting experiments at the Ernst Boehringer Institute for Drug Research in Vienna, Austria. Zlatanova was Department Head of the Molecular Genetics at the Institute of Genetics in the Bulgarian Academy of Sciences before becoming a Senior Research Professor at Oregon State University. She was also Deputy Director of the Biochip Center at Argonne National Laboratory and a Professor in the Department of Chemical and Biological Sciences and Engineering at Polytechnic University in Brooklyn, NY. Zlatanova is a member of the Bulgarian Union of Scientists, Biochemistry and Biophysics Section, the Austrian Biochemical Society, and the International Society for Plant Molecular Biology and was the recipient of an International Cancer Research Technology Transfer (ICRETT) Award. She has authored over 150 papers and numerous books and book chapters. Her research interests are in chromatin structure and dynamics and its role in transcription regulation.

Kensal E. van Holde is Distinguished Professor Emeritus in the Department of Biochemistry and Biophysics at Oregon State University. He earned his PhD in physical chemistry at the University of Wisconsin, Madison. After working as an industrial chemist, he returned to academia and in 1967, he joined the Department of Biochemistry and Biophysics at Oregon State University, reflecting his evolving interests from polymer chemistry to biology. van Holde has won numerous teaching and education awards, and is a fellow of the American Association for the Advancement of Science (AAAS) and member of the American Academy of Arts and Sciences and the National Academy of Science. His research has focused on the structure and function of oxygen transport proteins and the structure of chromatin. He is among the world's leading experts in biophysical chemistry and is the author of multiple textbooks.

Users Review

From reader reviews:

Dan Williams:

Information is provisions for those to get better life, information currently can get by anyone with everywhere. The information can be a information or any news even a problem. What people must be consider whenever those information which is from the former life are hard to be find than now's taking seriously which one is suitable to believe or which one the actual resource are convinced. If you get the unstable resource then you buy it as your main information it will have huge disadvantage for you. All of those possibilities will not happen within you if you take Molecular Biology: Structure and Dynamics of Genomes and Proteomes as your daily resource information.

Craig Harrison:

Typically the book Molecular Biology: Structure and Dynamics of Genomes and Proteomes will bring one to the new experience of reading a new book. The author style to clarify the idea is very unique. In case you try to find new book to see, this book very ideal to you. The book Molecular Biology: Structure and Dynamics of Genomes and Proteomes is much recommended to you to study. You can also get the e-book in the official web site, so you can quicker to read the book.

Clarence Bowen:

Reading a publication tends to be new life style in this particular era globalization. With looking at you can get a lot of information that may give you benefit in your life. Together with book everyone in this world may share their idea. Publications can also inspire a lot of people. Lots of author can inspire their very own reader with their story as well as their experience. Not only the story that share in the ebooks. But also they write about the knowledge about something that you need illustration. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book which exist now. The authors on earth always try to improve their talent in writing, they also doing some investigation before they write on their book. One of them is this Molecular Biology: Structure and Dynamics of Genomes and Proteomes.

Debra Shortt:

The guide with title Molecular Biology: Structure and Dynamics of Genomes and Proteomes has a lot of information that you can discover it. You can get a lot of profit after read this book. This specific book exist new information the information that exist in this publication represented the condition of the world today. That is important to yo7u to be aware of how the improvement of the world. This book will bring you within new era of the the positive effect. You can read the e-book on your own smart phone, so you can read the idea anywhere you want.
