

Walsh & Hoyt's Clinical Neuro-Ophthalmology: Volume Three

From Brand: LWW

Walsh & Hoyt's Clinical Neuro-Ophthalmology: Volume Three From Brand: LWW

Thoroughly revised and updated for its Sixth Edition, this classic work is the most comprehensive reference on diagnosis and treatment of neuro-ophthalmologic diseases. This edition has two new editors—Valérie Biousse, MD and John B. Kerrison, MD—and has been streamlined from five volumes into three tightly edited volumes with a sharper focus on patient management. Coverage includes major updates on genetics of diseases, new diagnostic techniques, and the newest treatment options.

This third volume covers degenerative, metabolic, infectious, inflammatory, and demyelinating diseases. Volume 1 covers the visual sensory system, the autonomic nervous system, the ocular motor system, the eyelid, facial pain and headache, and nonorganic disease. Volume 2 covers tumors, the phacomatoses, and vascular disease.

Editorial Review

Review

Journal of Neuro-Ophthalmology, Volume 25, Issue 3, Jonathan D. Trobe, MD -- "The chapters are mostly little masterpieces--well written, erudite, comprehensive, well-organized, and well-illustrated. It should be on the shelf of libraries of basic and clinical neuroscience departments and schools of optometry. Practitioners of neurology, neurosurgery, and neuro-ophthalmology will also want one. Like its earlier editions, a classic in the field. There is simply no other source for comprehensive information in neuro-ophthalmology. Many of the chapters are better than comparable ones in leading textbooks of neurology and neurosurgery."-Journal of Neuro-Ophthalmology The New England Journal of Medicine, Volume 353, Issue 6 -- "Nearly every neuro-ophthalmologist owns at least one edition of Walsh & Hoyt's Clinical Neuro-Ophthalmology. The editors, and more than 60 contributing authors, continue this tradition with the sixth edition. Written and edited by some of the leading authorities, this edition includes references to older, pertinent literature, and the value cannot be overstated. The editors have reduced the size of the book from the five volumes of the fifth edition to a more manageable three, without a decline in quality. The book includes an impressive collection of illustrations, illustrating even the rarest of disorders. This book represents an outstanding book and an essential reference for anyone interested in the field."-The New England Journal of Medicine Journal of the American Medical Association (JAMA), Volume 294, Issue 15 -- "Walsh and Hoyt's Clinical Neuro-ophthalmology is considered the paramount reference text in the field. Broad in scope and impeccably referenced, the multivolume text has regularly provided a comprehensive review of neuro-ophthalmology and the neuro-ophthalmic manifestations of neurologic, ophthalmologic, and systemic disorders. Similar in format to the last edition, the new sixth edition provides a multiauthored, encyclopedic text, rich in clinical acumen and teeming with clinical anecdotes. It is illustrated with black-and-white photographs. Slimmed down from five volumes to a mere three, the sixth edition is a fitting continuation of a time-honored text. Written and edited by international leaders in neuro-ophthalmology, each chapter provides an extensive discourse on the history, clinical features, diagnosis, and treatment of the relevant topic. Although many chapters bear a strong resemblance to those in prior editions, several have been updated extensively to reflect expanding knowledge. Of special note are the chapters on optic neuritis (volume 1) and cerebrovascular disease (volume 2). These outstanding updates demonstrate their individual authors' in-depth understanding of the subject matter and notable ability to organize difficult topics into coherent clinical visions. Walsh and Hoyt's Clinical Neuro-ophthalmology is an essential reference that belongs in every medical library, department of neurology, and department of ophthalmology."-Journal of the American Medical Association (JAMA)

Users Review

From reader reviews:

Gary Morrell:

Do you one among people who can't read gratifying if the sentence chained inside straightway, hold on guys this specific aren't like that. This Walsh & Hoyt's Clinical Neuro-Ophthalmology: Volume Three book is readable simply by you who hate those straight word style. You will find the data here are arrange for enjoyable reading experience without leaving also decrease the knowledge that want to supply to you. The writer of Walsh & Hoyt's Clinical Neuro-Ophthalmology: Volume Three content conveys thinking easily to understand by many people. The printed and e-book are not different in the content but it just different such

as it. So, do you still think Walsh & Hoyt's Clinical Neuro-Ophthalmology: Volume Three is not loveable to be your top list reading book?

Richard Nix:

People live in this new moment of lifestyle always aim to and must have the time or they will get a lot of stress from both lifestyle and work. So, if we ask do people have free time, we will say absolutely sure. People is human not really a huge robot. Then we consult again, what kind of activity are there when the spare time coming to you of course your answer may unlimited right. Then do you ever try this one, reading publications. It can be your alternative inside spending your spare time, the actual book you have read is actually Walsh & Hoyt's Clinical Neuro-Ophthalmology: Volume Three.

Francisco Morgan:

In this era globalization it is important to someone to obtain information. The information will make you to definitely understand the condition of the world. The condition of the world makes the information easier to share. You can find a lot of referrals to get information example: internet, classifieds, book, and soon. You can observe that now, a lot of publisher that will print many kinds of book. The book that recommended to your account is Walsh & Hoyt's Clinical Neuro-Ophthalmology: Volume Three this e-book consist a lot of the information from the condition of this world now. This book was represented how can the world has grown up. The words styles that writer use to explain it is easy to understand. Typically the writer made some research when he makes this book. Here is why this book acceptable all of you.

Douglas Elem:

As a university student exactly feel bored for you to reading. If their teacher questioned them to go to the library or to make summary for some book, they are complained. Just tiny students that has reading's internal or real their hobby. They just do what the educator want, like asked to the library. They go to there but nothing reading critically. Any students feel that reading is not important, boring along with can't see colorful photographs on there. Yeah, it is for being complicated. Book is very important in your case. As we know that on this era, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore, this Walsh & Hoyt's Clinical Neuro-Ophthalmology: Volume Three can make you feel more interested to read.
