Editorial Review

Review

Being a fourth-generation practitioner of TCM with 40 years of clinical experience, as well as being a Master of Qigong and director of the TCM Research Institute wherein my duties include teaching Chinese medicine to medical professionals worldwide, I deeply believe that this book, **Biomedical Acupuncture for Pain Management: An Integrative Approach**, is a milestone on the road toward integration of acupuncture into mainstream medicine and that it will open the door of acupuncture therapy to Western healthcare professionals.

This book is an indispensable guide to effectively incorporating acupuncture into any modern medical practice. The INMAS system is understandable and a brilliant distillation of this complex ancient healing art. I strongly endorse this innovative and practical textbook for all physicians who deal with neuromuscular symptoms.
