### Chemical Analysis of Firearms, Ammunition, and Gunshot Residue (International Forensic Science and Investigation) By James Smyth Wallace

Firearms and their associated ammunition, spent bullets, and spent cartridge cases provide useful information for identifying suspects, terrorist groups, and the criminal history of a weapon. Unfortunately, despite the numerous detailed books on the physical aspects of firearms, very little has been published on the chemical aspects, and what has been published is sparse and fragmented. Compiling information from the available literature and supplementing gaps with private communications and personal observations and research, **Chemical Analysis of Firearms, Ammunition, and Gunshot Residue** summarizes the history of firearms and ammunition as it relates to the development of modern weapons. It details chemical aspects of forensic firearms casework with particular emphasis on the detection of gunshot residues (GSR) on a suspect's skin and clothing surfaces.

Drawing on the extensive experience of the Northern Ireland Forensic Science Laboratory (NIFSL) which processed a large firearms caseload during the region's recent violent past, this book records the statistics gathered and the scientific methods developed to meet the demands of law enforcement and courts of law. It describes the analysis and methodology developed to routinely examine samples from terrorist suspects for both firearms and explosives residues. Providing crucial, hard-to-find data for forensic laboratories and forensic chemists with little or no prior knowledge of firearms, this seminal work presents a wide range of firearms chemistry information and outlines the creation of a statistical database to aid investigations.

**Dr. James Smyth Wallace** is a retired U.K. forensic scientist and a 25 year veteran of the Northern Ireland Forensic Science Laboratory. He is the author/co-author of 14 scientific papers, as well as a forensic science textbook. He is a member of the Forensic Science Society and retains an active interest in forensic chemistry, particularly in the area of trace evidence detection.

### Editorial Review

### Users Review

#### From reader reviews:

#### Ruth Graham:

What do you regarding book? It is not important to you? Or just adding material if you want something to explain what your own problem? How about your free time? Or are you busy person? If you don't have spare time to try and do others business, it is give you a sense of feeling bored faster. And you have extra time? What did you do? Every individual has many questions above. They must answer that question because just their can do which. It said that about e-book. Book is familiar in each person. Yes, it is proper. Because start from on guardería until university need that Chemical Analysis of Firearms, Ammunition, and Gunshot Residue (International Forensic Science and Investigation) to read.

#### Ana Vela:

In this 21st one hundred year, people become competitive in each way. By being competitive currently, people have do something to make these survives, being in the middle of the actual crowded place and notice by means of surrounding. One thing that often many people have underestimated that for a while is reading. Yeah, by reading a publication your ability to survive enhance then having chance to stand than other is high. For you who want to start reading some sort of book, we give you this specific Chemical Analysis of Firearms, Ammunition, and Gunshot Residue (International Forensic Science and Investigation) book as nice and daily reading reserve. Why, because this book is usually more than just a book.

#### Marla Fiske:

Chemical Analysis of Firearms, Ammunition, and Gunshot Residue (International Forensic Science and Investigation) can be one of your beginning books that are good idea. Most of us recommend that straight away because this e-book has good vocabulary that could increase your knowledge in words, easy to understand, bit entertaining but nonetheless delivering the information. The copy writer giving his/her effort to get every word into satisfaction arrangement in writing Chemical Analysis of Firearms, Ammunition, and Gunshot Residue (International Forensic Science and Investigation) although doesn't forget the main position, giving the reader the hottest along with based confirm resource information that maybe you can be certainly one of it. This great information could drawn you into fresh stage of crucial contemplating.

#### Harold Young:

What is your hobby? Have you heard in which question when you got students? We believe that that question was given by teacher to the students. Many kinds of hobby, Everyone has different hobby.

Therefore you know that little person like reading or as reading become their hobby. You should know that reading is very important in addition to book as to be the issue. Book is important thing to provide you knowledge, except your own personal teacher or lecturer. You will find good news or update regarding something by book. Different categories of books that can you choose to use be your object. One of them is niagra Chemical Analysis of Firearms, Ammunition, and Gunshot Residue (International Forensic Science and Investigation).
