Classification and Nomenclature of Electroanalytical Techniques: Analytical Chemistry Division Commission on Electroanalytical Chemistry By Yong Zhou

Classification and Nomenclature of Electroanalytical Techniques contains the revised and updated recommendations on electroanalytical classification and nomenclature. This report follows the general lines of its predecessor, but deviates from it in a number of details.

The electroanalytical techniques are classified according to the techniques in which neither the electrical double layer nor any electrode reaction need be considered; techniques that involve double-layer phenomena but in which any electrode reactions need not be considered; and techniques involving electrode reactions.
