Oracle Certified Master Java Enterprise Architect Java EE 7: Certification Guide By B V Kumar

Oracle Certified Master, Java Enterprise Architect Java EE 7 Certification Guide is a practical hands on guide for those looking to achieve the Master certification. It deals with the different technological aspects necessary to prop up the understanding of the aspirants and help them achieve a rich conceptual understanding of the latest Java Platform, Enterprise Edition.

It enhances their exam readiness by focusing on the most important categories defined by certification program at Oracle.

The contents cater to the following categories recommended by Oracle in detail with specific references to the different parts of the exams:

- Architectural fundamentals
- Web tier components
- Business tier components
- Web services
- Messaging and integration
- Security
- Architectural artifacts
- Design and architectural Patterns

The book is replete with examples and references to functional and non-functional aspects of using enterprise Java platform for application development. Detailed information on each of the major aspects of the certification examination is covered , including conceptual explanations, examples, code snippets, comparisons with the alternative technologies, communications, protocols, etc.

The book is accompanied by additional resources available on the source code site, which cover the most up-to-date information on all aspects of the certification examination, including FAQ, mock tests with answers, and some additional tests for preparation.

What you'll learn

- Core aspects of technologies, specifications, communication protocols, libraries and APIs involved in Java EE technology.
- Selecting security technology at different layers of architecture.
- Understanding GOF and J2EE patterns and applying them given a situation

Who this book is for

Java EE 7 certification aspirants, senior Java application developers, web application developers, and Java architects.

The book also will help Java enthusiasts at various levels to understand technologies at conceptual as well as application level. Students of computer science and information technology at the post-graduate level will also be able to understand and appreciate the technology of Java Enterprise Edition.
