The Sea Lady: A Tissue of Moonshine By H. G. Wells

The intricately narrated story involves a mermaid who comes ashore on the southern coast of England in 1899. Feigning a desire to become part of genteel society, the mermaid's real design is to seduce Chatteris, a man she saw "some years ago" in "the South Seas—near Tonga," who has taken her fancy. This she reveals in a conversation with the narrator's second cousin Melville, a friend of the family that adopts Miss Waters. As a supernatural being she is unimpressed with the fact that Chatteris is engaged to a Miss Glendower and is trying to make amends for his wastrel youth by entering politics. Chatteris is unable to resist the mermaid's alluring charms, though succumbing means his death.

Editorial Review

Review

"Wells's masterpieces get the red-carpet treatment here in these luxurious editions...academic collections supporting English departments should definitely invest in this volume" --Library Journal

"Stover is to be thanked for his years of Wellsian scholarship" --Public Library Quarterly

"Stover, by presenting the intellectual underpinnings of Wells' work, has provided a powerful tool for understanding his writings, one sees them more deeply, without losing that earlier sense-of-wonder that originally opened the vistas of the young reader's mind...a crucial guide to these classics of science fiction" --Fosfax

About the Author

Often called the father of science fiction, British author Herbert George (H. G.) Wells literary works are notable for being some of the first titles of the science fiction genre, and include such famed titles as *The Time Machine*, *The War of the Worlds*, *The Island of Doctor Moreau*, and *The Invisible Man*. Despite being fixedly associated with science fiction, Wells wrote extensively in other genres and on many subjects, including history, society and politics, and was heavily influenced by Darwinism. His first book, *Anticipations of the Reaction of Mechanical and Scientific Progress Upon Human Life and Thought*, offered predictions about what technology and society would look like in the year 2000, many of which have proven accurate. Wells went on to pen over fifty novels, numerous non-fiction books, and dozens of short stories. His legacy has had an overwhelming influence on science fiction, popular culture, and even on technological and scientific innovation. Wells died in 1946 at the age of 79.

Users Review

From reader reviews:

Chris Gibbons:

Book is usually written, printed, or descriptive for everything. You can learn everything you want by a book. Book has a different type. To be sure that book is important issue to bring us around the world. Adjacent to that you can your reading proficiency was fluently.
